

Instructor Led – On-Site and Milwaukee Training Schedule

INSTRUCTOR LED – ON-SITE and MILWAUKEE TRAINING SCHEDULE

Product Training and Publications has identified Instructor Led Training, or ILT, as the primary delivery method for skills-based training. ILT is provided in two ways:

- **Milwaukee Based Training**
- **Field Based Training**

Milwaukee based training provides students the opportunity to work hands on with some of the equipment system components. Students are introduced to skills-based subjects in a classroom environment then taken into our Training Lab where they practice skills to successfully troubleshoot and maintain specific products.

The Training Lab is loaded with the latest in equipment product technology.

Field based training is held at the customer's facility. By conducting training on-site, our Instructors can tailor the training to appropriate systems.

Field based training can become resource intensive. Therefore, we have partnered with our regional service organizations to assist in those instances when Factory instructors are not available. The Regional Trainers are backed by the world class training programs developed by Product Training and Publications.

All Komatsu Instructor led product training is conducted by Factory Authorized Instructors. Please contact the Komatsu Service Organization in your area for more information on Product Training.

2020 Technical Training Schedule

Milwaukee Training:

Centurion AC Shovel Control System June 8 – 11, 2020

The student is introduced to the operation and maintenance of the P&H Electrical mining shovel. Furthermore, the course focuses on critical knowledge and skills required in supporting present day P&H Electrical mining shovels.

Centurion DC Shovel Control System June 15 – 18, 2020

This course introduces the student to the operation and maintenance of the P&H Electrical mining shovel. It focuses on critical knowledge and skills required in supporting current production P&H Electrical mining shovels.

Shovel Mechanical Systems June 22 – June 25, 2020

The course introduces the student to the operation and maintenance of P&H electric mining shovels. All mechanical systems and adjustments are discussed. Recommended preventive and corrective maintenance procedures and practices are also discussed. Guided tours of P&H's National Avenue Main Plant.

On-Site Training:

Instructor Led Classes are schedule "On Demand" throughout the year.
