

## Log Stackers

### Benefits at a Glance

- Versatility
  - Can handle full length and CTL logs in one pass
  - Highest lift in the industry at 7.32 m (24 ft.)
  - Tight turning radius provides maneuverability for working in small spaces
  - Performs a variety of functions including mill feeding, full truck loading, rail car loading, high decking, spreading and sorting
- Proven Performance
  - Two-speed hoist and quick acceleration improve truck cycle times
  - High reliability with low replacement/maintenance costs provides lowest operating cost in industry
  - Over 50 years of experience in log handling
- Improved Safety
  - Cab provides better visibility, ergonomic controls and noise reduction
- Environmentally friendly
  - Lowest fuel usage of any comparably sized machines
  - No hydraulic cylinders to leak and pollute groundwater

### Description

LeTourneau log stackers are highly versatile machines utilized in a wide variety of log handling applications. Fifty years of experience have led to design innovations and advanced technology resulting in increased reliability and performance. The rugged design promotes longevity: 30-plus years of service life is common.

Our product support is second to none, with 24-hour access to factory trained service mechanics and welders along with OE parts and components (new and rebuilt). We offer a rebuilt component exchange program, machine rebuilds, maintenance plans and a factory warranty. Contact your nearest representative to learn more about our products and service.

Models	35 Series	45 Series	50 Series	55 Series
Operating lift capacity	31,752 kg 70,000 lbs.	40,824 kg 90,000 lbs.	45,359 kg 100,000 lbs.	49,896 kg 110,000 lbs.

Spreading and sorting	✓	✓	✓	✓
Rail car loading			✓	✓

**Standard equipment:**

- Two-wheel and four-wheel models available for each series
- Operator cab features: joystick control, heater, defroster fans, illuminated instrument panels, adjustable air seat and suspension
- Gauges: air pressure, Murphy engine, hydraulic tank level and more
- Indicators and alarms: dynamic braking, system air pressure, blower motor failure, converter system failure and more
- Electrical features: 400 or 700 kW air-cooled generator, back-up lights and alarms, motor overload cutout, two-speed hoist, steering assist and more
- Two engines available: Detroit Series 60 or Cummins QSX15

**Optional equipment:**

- Structural: positive arm kickers, service platform/ladder and a hi-cube carriage
- Operator comfort: Red Dot air conditioner and tilt console
- Electrical: additional lights and beacons, emergency stop, overload cutout
- Cold weather: heaters for battery, strip, oil and water
- Fire suppression: fire extinguishers and Ansul four-nozzle fire suppression system

*Detailed specifications are available for each model.*
