P&H 2800XPC AC Shovel
building on proven success

Mine operations and maintenance managers demand the best from their loading tools. For this reason, Komatsu Mining has been the electric mining shovel market share leader and preferred equipment supplier to the world’s toughest mining environments for over 100 years.

Komatsu is proud to offer the P&H 2800XPC AC electric mining shovel. The P&H shovel line is combining its solid reputation of reliability with the proven Centurion electrical control system, industry leading IGBT AC technology, rugged structures and the industry’s only direct field service and support network to set the industry standard for electric mining shovels.

Increases in availability and productivity ultimately lead to the lowest cost per ton and the most efficient ultra-class loading tool available in the industry today. P&H shovels dig deeper into the realms of productivity, safety and reliability with greater control, comfort and consistency.

Proven performance

P&H AC-Drive shovels are exceeding customer requirements and expectations:
- 3% faster cycle times
- 2.5% increase in availability
- 5% increase in productivity

Providing our customers:
- Lowest total cost of ownership
- Highest productivity
- Superior machine reliability and durability

We set the industry standard for electric mining shovels

A closer look
The P&H 2800XPC AC utilizes proven components:
- Common motors and drive line-up as on proven P&H 4100XPC AC and P&H 4100C BOSS AC machines
- Structures developed with advanced design software and field data collection
- Motors designed and manufactured by Komatsu specifically for electric mining shovels

The P&H AC performance edge

Attachment of choice for the world’s toughest applications
- Twin-leg dipper handle – Stable dipper trajectory, faster cycle times, higher productivity
- Rack and pinion crowd – Less maintenance, all-weather performer
- Optima dippers – Mine-matched dippers with adjustable pitch braces for precise rake angles

Rugged components
- Dual hoist motors – Balanced and evenly distributed load
- Delta drive – Improved shoe-to-tumbler engagement
- Planetary transmissions – Proven long life on swing and propel with over 20 million hours logged

Technology
- Centurion electrical control system – Superior performance, monitoring and data integration capabilities
- Universal shovel interface – Send and receive data with any mine management system
- PreVal remote health management – Real time machine health and performance management

World-class cab
- Clear sight lines
- Easy access to command and control functions
- Access to key data on machine health and performance provided by Centurion electrical control system

Smart Solutions
Our smart connected products and systems, advanced analytics and direct services are integrated together and customized to solve our customers’ toughest challenges:
- Service products and consumables
- Machine assembly and rebuild
- Component exchange programs
- Life cycle management
- Genuine OEM parts
- Prognostics and remote health management

We are driven by achieving the lowest total cost of ownership for our customers:
- Quality components
- Focus on machine availability and productivity
- Heavy-duty structures
- Komatsu Mining field support

Komatsu and ABB:
Two leaders combine to deliver breakthrough productivity and performance
ABB is the global leader in drives with 40+ years of experience.
- ABB’s Direct Torque Control has the best dynamic performance in the industry
- Our AC drives are compact, air-cooled, modular
- Maintenance-friendly modules are easy-to-replace

Komatsu Mining is the worldwide leader in electric mining shovels. The P&H 2800XPC AC sets the standard in performance and productivity.

- Powerful advancements based on already-successful technologies
- Extensive collaboration with customers and our drive partner ABB
- Years of experience in building rugged, reliable equipment

We are driven by achieving the lowest total cost of ownership for our customers:
**P&H 2800XPC Electric Mining Shovel – AC Drive**

**General Specifications**

### Working ranges
- **Height of cut**: 16.6 m (54 ft. 6 in.)
- **Radius of cut**: 24.2 m (79 ft. 3 in.)
- **Dumpling height** (door open): 9.1 m (30 ft. 0 in.)
- **Floor level radius**: 16.4 m (53 ft. 9 in.)
- **Tail swing radius**: 9.1 m (30 ft. 0 in.)
- **Operator eye level**: 9.6 m (31 ft. 4 in.)

### Capacity
- **Nominal payload**: 59.0 mt (65.0 st)
- **Nominal dipper capacity**
  - **SJE struck**: 26.8-33.8 m³
  - **SAE 2.7**: 29.2-36.8 m³
  - **SAE 3.0**: 38.1-44.0 yd³
- **Rated suspended load**: 122.5 kN (27.5 US tons)
- **Optimum truck size** (218 mt (240 st) truck shown): 172.240 m³
- **Voltage per customer requirements**: 4160 V or 7200 V

### Electrical control systems
- **Electrical drive ratings**
  - **50 Hz, 2000 V**
  - **Drive power**: Total 3986 kW / 5370 hp
  - **IGBT supply unit (ISU)**: 4500 kVA
  - **Crowd motion**: 1160 kW
  - **Hoist motion**: 4640 kW
  - **Propel motion**: 2230 kW
  - **Swing motion**: 3482 kW
- **The electrical drive system** is comprised of a multi drive platform, sharing a common DC bus between the IGBT Supply Unit (ISU) and the motor drive Inverter Units (INU). The fully regenerative INU controls the power flow to and from the shovel, maintaining a unity power factor with extremely low harmonic content. The fully regenerative ISU controls the power flow to and from the individual AC motors.

### Electrical control
- **Centurion supervisory controller** provides direct integrated communication with motor drives giving precise motor control and fast cycle times. Real-time multi-tasking capability allows for optimal machine logic sequencing, monitoring and control.
- **Centurion I/O system** uses ‘Profibus’ communication protocol for seamless integration of all shovel subsystems and future expandability. Low-voltage 24V DC I/O drop points feature open and short circuit detection for improved diagnostics and troubleshooting.
- **Centurion information system’s enhanced Graphical User Interface (GUI)** features intuitive, icon-based screens to display vital information such as shovel status, troubleshooting information, and optional production monitoring data and operator feedback.
- **P&H digital AC drive** provides precise, reliable, solid state power to the main motion motors.

### Propulsion
- **Propel on demand** provides rapid transfer to propel mode. Rapid transfers allow frequent positioning of the shovel to the bank resulting in faster cycle times and more efficient digging.
- **Two rugged P&H planetary gear cases** of proven design independently transmit torque to the drive sprockets, producing the tractive effort required for fast, efficient propel and positioning operations.
- **P&H brand Delta drive** low tension sprocket drive system with heavy-duty cast crawler shoes.

### Hoist
- **All gear housed in single enclosed gear case** with filtered and cooled oil fed to all bearings in addition to splash lubrication for reliable operation and ease of maintenance.
- **Large 56” diameter hoist drum** for extended rope life. **Ferrule becket** for ease of maintenance.
- **TripRite system** utilizes a brushless DC electric motor with sealed planetary gearhead and internal encoder, allowing precision on hoist velocity and load.

### Dipper and dipper trip
- Optima dippers combine consistent productivity with high durability and maintainability. Dippers are configured to mine specific conditions and capacity requirements from a variety of combinations of body and lip designs, as well as other unique Komatsu technologies. Specific wear packages and GET styles can be cooperatively specified.

### Cable data
- **Hoist (wire rope)**: 60 mm (2.36 in.), 4160 V
- **Suspension (bridge strand)**: 30 mm (1.18 in.), 5000V
- **Dipper trip (wire rope)**: 13 mm (0.50 in.), 5000V

---

*Height shown with bail-type dipper. Actual dumping height can be greater than door clearance height.*

*Payload and dipper capacity are dependent on many factors. Contact Komatsu Mining for an analysis of your specific application.*

**Features and customization**

The P&H 2800XPC is built with several features to enhance safety, reliability, and productivity over the lifecycle of the operation.

- Automatic lubrication and compressed air systems with advanced diagnostic and control
- Temperature monitoring system for all AC motors, drum shaft bearings and shipper shaft bearings
- Automatic boom soft setdown system (ABSS) and boom profile protection envelope to help prevent excessive loading to the attachment during operation
- Anti-swing-in-bank system to reduce excessive side loading on handle and attachment
- Remote hoist control pendant and hoist rope winch to assist in safe and efficient rope changeouts
- House pressurization system to provide filtered air for cooling and dust repression

The shovel has multiple options for local and minesite specific conditions in the following areas:

- Climate control
- Technology and software
- Maintenance systems

**Machinery deck plan**

- Air compressor
- Lift wall I/O box
- AC drive line-up
- Filter control cabinet
- Swing motor and transmission
- Ground fault cabinet
- Auxiliary circuit breaker
- Auxiliary transformer
- Main transformer
- High voltage cabinet with isolators
- Lighting load center
- Hoist motor
- Lube reservoir
- Low voltage collector
- Swing motor and transmission
- Hoist capstan
- Front wall I/O box
- 120 VAC load center
- Comoran AC control cabinet
- Touch screen monitor
- Motor control center
- Auxiliary load center
- Electrical cabinet
- Space for appliances
- Trainer’s station
- Lockers
- Storage cabinet

**Ground pressure and weight**
