4100C BOSS
Electric Mining Shovel
General Specification

Capacity
Nominal payload* 90.7 mt 100 st
Nominal dipper capacity
SAE struck 44.3 m³ 58.0 yd³
SAE 2:1 48.4 m³ 63.0 yd³
Rated suspended load 161.0 mt 178 st
Optimum truck size (360 mt (400 st) truck shown) 172-383 mt 190-400 st

*Payload and dipper capacity are dependent on many factors. Contact Komatsu Mining for an analysis of your specific application.

Working Ranges
Height of cut 16.9 m 55 ft. 4 in.
Radius of cut 24.7 m 80 ft. 11 in.
Dumping height* (door open) 9.5 m 31 ft. 0 in.
Floor level radius 16.3 m 53 ft. 5 in.
Tail swing radius 11.6 m 38 ft. 0 in.
Operator eye level 9.8 m 32 ft. 3 in.

*Height shown with bail-type dipper. Heights will be greater with bail-less or compact-bail dippers. Actual dumping height can be greater than door clearance height.

*Voltage per customer requirements

Propel

Propel on demand provides rapid transfer to propel mode. Rapid transfers allow frequent positioning of the shovel to the bank resulting in faster cycle times and more efficient digging.

Two rugged P&H planetary gear cases of proven design independently transmit torque to the drive sprockets, producing the tractive effort required for fast, efficient propel and positioning operations.

Delta drive low tension sprocket drive system with heavy duty cast crawler shoes.

Spring-set air release disc brakes – one per motor.

Crowd

Powerband V-belt drive between motor and gear case absorbs shock loads.

First and second reduction gearing in enclosed gear case for reliable splash lubrication, ease of maintenance, and extended component life.

Twin-leg dipper handle with torsion box and rack and pinion drive has inherent stability in the bank for optimal digging.

Spring-set air release disc brake.

Swing

Two modular P&H planetary gear cases of proven design and a single piece forged swing gear transmit torque for fast cycle times.

Spring-set air release disc brakes – one per motor.

Splash lube filtration system.

Hoist

All gearing housed in single enclosed gear case with filtered and cooled oil fed to all bearings in addition to splash lubrication for reliable operation and ease of maintenance.

Large 68" diameter hoist drum for extended rope bending life. Ferrule becket system and dual electric tuggers are standard for efficient rope change.

Spring-set air release disc brakes – one per motor.
